CD-ROM Patent Images by Technology

The U.S. Patent and Trademark Office announces the implementation of a demonstration project to provide classified sets of

patent images in CD-ROM format. The classified sets are collections of U.S. patents which, by virtue of their placement in the U.S. Patent Classification System, represent meaningful technological groupings.

The two classified sets selected for this project are: Genetic Engineering, as defined by Class 935 and Class 435, subclass 172.3; and Acid Rain, as defined by Class 55, subclass 73 and Class 423, subclasses 220-234 and 242-244.

The sets will contain:

1) current classification information
2) full images for all patents in the set, and
3) full text for those patents in the set where the text is available in electronic format, i.e., since 1971

All available text and classification information will be indexed and searchable, thus allowing all patents in the set to be retrieved by their associated classification information, and/or by words in the text. Images of all patents in the set will be stored in numeric sequence on the discs and may be located on a disc other than the disc where the text and indexes are stored. Images may be retrieved by patent number after loading the appropriate image disc.

It is anticipated that the demonstration CD-ROM sets will be available July 1992. Each set will consist of approximately three discs. They are available for order now by the public for $150 per set. This price represents the marginal cost to the U.S. Patent and Trademark Office to produce and distribute these discs based upon the volume of orders anticipated.

Purchasers will be invited to participate in a voluntary survey to be conducted in October 1992 to assess the usefulness of this demonstration product.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
